

Company Introduction

WarOnCancer is a tech company on a mission to improve mental health for everyone affected by cancer. The WarOnCancer App is a social media app for patients, survivors and loved ones – a niche community for cancer focused on content creation and storytelling as a driver of engagement.

By uniting on a global platform, we are working towards building an infrastructure where our members can contribute their data to the larger cancer ecosystem, and hence play an essential part in accelerating healthcare and improving research.

Job Description

At WarOnCancer you are not only a Front-End Developer, you are a visionary on a mission to help make the world a better place and you will see the impact of your daily job in the lives of others.

Responsibilities will include translation of the UI/UX design wireframes to actual code that will produce visual elements of the application. You will work with the UI/UX designer and bridge the gap between graphical design and technical implementation, taking an active role on both sides and defining how the application looks as well as how it works.

Responsibilities

- Develop new user-facing features
- Build reusable code and libraries for future use
- Ensure the technical feasibility of UI/UX designs
- Optimize application for maximum speed and scalability
- Assure that all user input is validated before submitting to back-end
- Collaborate with other team members and stakeholders, as well as our remote tech team

Responsibilities

- You have at least 2 years of relevant experience
- Android experience is a bonus
- You are proficient in PostgreSQL, React.js, Node.js (or similar frameworks like Django or Ruby on Rails).
- Proficient understanding of web markup, including HTML5, CSS3
- Basic understanding of server-side CSS pre-processing platforms, such as LESS and SASS
- Proficient understanding of client-side scripting and JavaScript frameworks, including jQuery
- Good understanding of asynchronous request handling, partial page updates, and AJAX
- Basic knowledge of image authoring tools, to be able to crop, resize, or perform small adjustments on an image. Familiarity with tools such as Gimp or Photoshop is a plus.
- Proficient understanding of cross-browser compatibility issues and ways to work around them.
- Proficient understanding of code versioning tools, such as Git.
- Good understanding of SEO principles and ensuring that application will adhere to them.

Send your application to career@waroncancer.com.
