

Company Introduction

WarOnCancer is a tech company on a mission to improve mental health for everyone affected by cancer. The WarOnCancer App is a social media app for patients, survivors and loved ones – a niche community for cancer focused on content creation and storytelling as a driver of engagement.

By uniting on a global platform, we are working towards building an infrastructure where our members can contribute their data to the larger cancer ecosystem, and hence play an essential part in accelerating healthcare and improving research.

Job Description

At WarOnCancer you are not only a Full-Stack Developer you are a visionary on a mission to help make the world a better place and you will see the impact of your daily job in the lives of others.

You'll be responsible participating in our product development from ideation to deployment and beyond, and then working as part of a team to execute new features or products. The ideal person for this role is a problem-solver with an inquisitive and innovative mind, and loves to collaborate with other teams to drive the company forward.

Responsibilities

- Participate in our product development from ideation to deployment and beyond.
- Create groundbreaking new features for our users,, and for internal use.
- Work with our data team to make our product smarter and more intuitive to use.
- Maintain and help optimize existing systems.
- Represent the company and product and conferences.
- Collaborate with other team members and stakeholders, as well as our remote tech team

Responsibilities

- You have at least 2 years of hands-on experience creating public, complex systems using multiple languages.
- You are proficient in PostgreSQL, React.js, Node.js (or similar frameworks like Django or Ruby on Rails).
- You know your way around HTML and CSS.
- Experienced in developing responsive, interactive websites.
- You feel at home working in a test-driven, agile team.
- You know your limits and how to work on a deadline.
- You are a problem-solver with an inquisitive and innovative mind.
- Experience in AWS.
- Ability to take on the new challenges ahead together with the growing business.
- BS in Mathematics, Economics, Computer Science, Information Management or Statistics is a plus.
