

## Company Introduction

WarOnCancer is a health tech company on a mission to improve mental health for everyone affected by cancer. The company is developing a social network for patients, survivors and loved ones where members can capture and share the world's moments, connect, follow and thrive.

By uniting on a global platform, we are working towards building an infrastructure where our members can contribute their data to the larger cancer ecosystem, and hence play an essential part in accelerating healthcare and improving research.

## Job Description

At WarOnCancer you are not only a Product Manager, you are a visionary on a mission to help make the world a better place and you will see the impact of your daily job in the lives of others. You are the bridge between the needs of our customers/users, partners/founders, marketing team, design team and engineering team. As such, you act and treat the product in the same way you would if you were the product owner and take the responsibility equally seriously. The Product Manager will manage the whole product life cycle, combining the product vision with the hands-on skills to work with engineers, developers, designers and cross-functional teams in order to increase the speed to market for new products and/or product features.

You measure the product's, your own and the team's success by carefully defined KPIs. You consistently seek user feedback and keep abreast of market trends; iterating to adapt to the best possible product to market fit and ensuring that our products are the most innovative in the market.

## Responsibilities

The product manager is responsible for technical scope/requirement documentation (functional and non-functional); product/initiative architecture; code review guidelines and adherence; QA processes/quality procedures, system and unit testing, minimizing bugs; continuous delivery; high frequency deployments and releases; DevOps; managing team of developers in their day-to-day tasks and goals.

In addition, the Product Manager is especially adept at the following: stakeholder management/communication; market and customer research; has an advanced level of understanding of UX/UI including producing wireframes, prototypes/mock-ups etc.; gathers business requirements including specification/documentation; manages roadmap and product strategy; problem solving and data analysis; cross-functional team coordination/communication; agile methodologies; a basic understanding of software architecture and the ability to “train the trainer” within Product Management.

## Requirements

- Experience as a product manager or CPO
- Experience in strategic planning, risk management
- Experience in leadership and stakeholder management
- Experience leading (onsite & remote) Agile Software Development Teams
- Scrum / Kanban and general Agile Practises
- Experience using Jira, Trello and/or other similar project management tools
- (Bonus) Technical background (Software Dev., UX, UI Design)
- (Bonus) Certification (Certified Scrum Master, Certified Scrum Product Owner, PMP, PMI – ACP etc.)
- Critical thinking and problem solving is second nature to you
- Excellent client-facing and internal communication skills
- Change management and adaptability (you will be working in Agile environments with fast release cycles)
- Resourceful, adaptable and persistent. This is a startup. There are huge and endless possibilities and we already have partnerships in place with e.g. Microsoft and Bing. However, you will need to think lean and enjoy the true startup mentality, dig in and get your hands dirty in order to reshape the future of healthcare. Only the passionate need apply!

**Send your application to [career@waroncancer.com](mailto:career@waroncancer.com) no later than 31/10/2018. We will be interviewing continuously and may close the recruiting process before this date.**
