

Company Introduction

WarOnCancer is a tech company on a mission to improve mental health for everyone affected by cancer. The WarOnCancer App is a social networking app for patients, survivors and loved ones.

By uniting on a global platform, we are working towards building an infrastructure where our members can contribute their data to the larger cancer ecosystem, and hence play an essential part in accelerating healthcare and improving research.

We value Norm-Challenging, Collaborative people with Integrity, and we believe you do the same!

Job Description

We are looking for an experienced UI/UX Designer to join our mission to create an amazing user experience of WarOnCancer on the web, and in our app. You'll be working alongside our product manager, who is heavily involved in the UX design, so your core strength should lie within the visual aspects of UI design. Your designs will make difference in people's lives very clearly!

Responsibilities

- Collaborate with product management and developers to define and implement innovative solutions for app and website design
- Execute all visual design stages from concepts, clickable prototypes, to working alongside the development team in implementing the designs
- Create wireframes, storyboards, user flows, and site maps depending on the needs, to effectively communicate interaction and design ideas
- Present and discuss designs and key milestone deliverables with peers and executive level stakeholders
- Conduct user research and evaluate user feedback both before and after implementation stage
- Establish and promote design guidelines, best practices and standards
- Create designs that align with our brand identity guidelines where appropriate

Requirements

- Proven strong UX/UI work experience in iPhone and Android app design
- Web design / building experience is a bonus
- Demonstrable UI design skills with a strong portfolio
- Solid experience in creating concepts, storyboards, and flows charts
- Proficiency in Sketch, Adobe XD, or other visual design and prototyping tool to create clickable prototypes
- Excellent visual design skills with sensitivity to user-system interaction
- Ability to present your designs to various stakeholders and together find the best solutions
- Ability to solve problems creatively and effectively
- Up-to-date with the latest UX and UI trends, techniques, and technologies
- Excellent communication skills and a structured work process is needed as we work distributed
- BS/MS in Human-Computer Interaction, Interaction Design, or related
- Experience working in an Agile/Scrum development process
- Resourceful, adaptable and persistent. This is a startup. There are huge and endless possibilities and we already have partnerships in place with e.g. Microsoft and Bing. However, you will need to think lean and enjoy the true startup mentality, dig in and get your hands dirty in order to reshape the future of healthcare. Only the passionate need apply!
